Dear Bob,

I think you should read this amazing book I just finished. It is called spy camp because when I read this book I felt I really knew the characters and I hoped this happened in real life. The author is Stuart Gibbs. I have only read two of his books and I loved both of them and I am going to read more.

It is about the CIA, spies and it is really interesting. It tells you how they felt, got schooled and how they acted. I felt excited, sometimes adrenaline surged through me and I felt relieved when it was all over but when the book finished

I was sad because I really liked the book.

You should certainly read this book if you want to feel like you're in the CIA and have all the excitement that I had reading this book.

From your friend
Austin
