Dear Millie,

You have to read this book! I have recently finished Code name bananas by David Walliams and I know how much you love books that are funny with animals in (especially gorillas) so I know that you will love this book. I have read a few David Walliams books in the past but this is the best by far. It is funny but still action packed and makes you want to read at the same time. Before this book I never knew you could get addicted to a book, but you can just the same as a game or television program.

It is filled with silly comments and made up words but you still feel attached to the characters as if you were there the whole time or were a close friend. I also know that you are learning about the first world war at school so this book should help you understand how the animals felt when the bombers came to london every night.

This book is very long but it doesn't lose your interest halfway through like some books do but keeps giving you more content that is different. The book has six parts and sixty seven chapters that are either funny, scary or even sad parts or a mix of them all.

So I highly recommend this book to you because I know you will love it

From Maud xxxx
